

CLAIMS

I claim:

- 5 1. A hair accessory organizer device comprising:
a bottom tray having bottom and side walls;
pedestal support members including a first pedestal support
member being attached upon said bottom tray;
a tubular pedestal being securely and removably attached to
10 said pedestal support members; and
a top tray being removably attached upon said tubular
pedestal.
- 15 2. The hair accessory organizer device as described in claim
1, wherein said bottom tray also includes a plurality of partitions
being disposed upon said bottom wall of said bottom tray and being
arranged to form a plurality of storage compartments.
- 20 3. The hair accessory organizer device as described in claim
2, wherein said pedestal support members are boss members.
- 25 4. The hair accessory organizer device as described in claim
3, wherein said first pedestal support member is centrally-disposed
upon said bottom wall in one of said storage compartments of said
bottom tray and has external threads being disposed about a side
wall thereof.
- 30 5. The hair accessory organizer device as described in claim
4, wherein said tubular pedestal has open top and bottom ends and a
bore extending therethrough, said first pedestal support member

being threadingly received in said bore through said open bottom end of said tubular pedestal.

6. The hair accessory organizer device as described in claim
5 5, wherein said pedestal support members also include a second pedestal support member which is centrally-attached and engages in a hole in a bottom side of a wall of said top tray and is engagably and removably received in said bore through said open top end of said tubular pedestal.

10

7. The hair accessory organizer device as described in claim 6, wherein said top tray also includes a plurality of band holding members being spacedly disposed upon a top side of said wall thereof, and further includes a plurality of ribbon-receiving slots
15 being spacedly disposed along and in edges of said wall thereof.

8. The hair accessory organizer device as described in claim 7, wherein each of said band holding members is generally a block having opposed longitudinal sides which are joined at ends thereof
20 and which have central portions which are bowed outwardly for holding and supporting ponytail bands, in particular.

9. The hair accessory organizer device as described in claim 8, wherein said band holding members include first and second sets
25 of said band holding members which are opposedly disposed along edges of said wall of said top tray.

10. The hair accessory organizer device as described in claim 9, wherein said band holding members of each of said first and

second sets of said band holding members are spacedly aligned side-by-side.

11. The hair accessory organizer device as described in claim 7, wherein each of said ribbon-receiving slots is defined by side edges which have central portions which are bowed away from one another, and which also have end portions which are closely spaced from one another thus generally forming a narrow slot portion for engaging a ribbon therein.

12. The hair accessory organizer device as described in claim 11, wherein said ribbon-receiving slots include first and sets of said ribbon-receiving slots which are opposedly disposed along said edges of said wall of said top tray with said ribbon-receiving slots being spacedly disposed side-by-side.
